of Spaces

Mappings as Joint Spatial Display

Workshop
and Conference of the
SFB 1265 "Re-Figuration of Spaces"

29./30. November 2018

DFG

TU

IRS

Leibniz-Institut für
Raumbezogene Sozialforschung

Freie Universität
Berlin

WWU
MÜNSTER

HKW
Haus der Kulturen der Welt

Program

Thursday, 29.11.2018, 9 am – 8 pm

Venue:
Haus der Kulturen der Welt (HKW)
John-Foster-Dulles-Allee 10, 10557 Berlin

9 am | Opening of the Conference with Welcome Address

9.30 - 12.30 am

Hands-on Workshop Part 1

Workshop moderators: Jörg Stollmann, Dagmar Pelger, Séverine Marguin together with Joost Grootens and Philippe Rekacewicz

The hands-on workshop aims to create a mapping of the HKW itself: how international and open is this cultural institution, from the point of view of its art production, but also of its reception? Which different spaces are crossed in HKW context? Which phenomena of polycontextualization can be observed? The hands-on workshop is organised in the framework of the interdisciplinary studio “Das Haus der Kulturen der Welt – in der Welt” at the Chair for Urban Design and Urbanization (Institut für Architektur, Technische Universität Berlin)

12.30 am - 2 pm | Lunch Break

2 - 5 pm

Hands-on Workshop Part 2

7 pm

Short Introduction of the SFB Serie “Refiguring Spaces” in the HKW

Bernd Scherer, Martina Löw, Stefanie Bürkle

7.30 pm

Keynote:

More Matter with Less Art

Joost Grootens (Graphic-Designer, Studio Joost Grootens, Amsterdam)

Mappings as Joint Spatial Display

At the interface between sociology of space, architecture, urban studies and geography, the conference aims to raise an interdisciplinary methodological discourse about the instruments of mapping for the research on space by confronting two specific and so far disconnected methodological discourses on data integration: the sociological discourse on joint displays and the discussion about mapping from the spatial sciences.

What can we learn from this confrontation? It raises several problematics/themes:

- the instrumental integration of textual, visual and numeral data into one single interface. How can it be technically executed?
- the visual character of the integrations. What does it mean on an epistemological level to visualize the integration? Does the visualization need a description or can it stand for itself?
- the integration of qualitative and quantitative data. How to build a coherent visualization?
- the integration of different scales: how to integrate multi-level analysis into one display?
- the integration of virtual and physical space into one display.

Friday, 30.11.2018, 9 am – 5.30 pm

Venue:
Sonderforschungsbereich 1265, BH-N Building, Room 230
Ernst-Reuter-Platz 1, 10587 Berlin

9 am | Welcome and Introduction to the Day

Panel 1: Scientific Discourse about Integration of Heterogenous Data and Visualization

9.30 - 10.15 am

Joint Displays and Visualization in Mixed Methods Research

Udo Kuckartz (Sociology, Philipps-Universität Marburg)

10.15 - 11 am

Is Innovation in Cartography a Mere Illusion? - How the Specific Constraints of Cartography Limit the Creation of New Relevant Spatial Visualizations

Denis Eckert (Geography, Centre Marc Bloch Berlin)

11 - 11.30 am | Coffee Break

Panel 2: Mapping the Urban: An Architectural and Urban Research Tool for the Integration of Heterogenous Data

11.30 - 12.15 am

Reconstructing Conflict: Mapping as Materialization of Contested Memories and Invisibilized Crime

Anne Hufschmid (Cultural Sciences, Freie Universität Berlin)

12.15 am - 1 pm

Atlas of Invisible Spaces - Mapping the Interface between School and City

Antje Lehn (Architecture, Akademie der bildenden Künste Wien)

1 - 2.30 pm | Lunch Break

Panel 3: Interdisciplinary Roundtable

2.30 - 4.30 pm

Territories of Urbanisation: Mapping Projects

Milica Topalovic and Hans Hortig (Architecture, Eidgenössische Technische Hochschule Zürich) and Philippe Rekacewicz (Geography, University of Helsinki, visionscarto.net)

4 - 4.30 pm | Coffee Break

4.30 - 5.30 pm

Final Discussion
